

Trust through automation

# Trust through automation

We have been using state-of-the-art CNC milling technology for many years now to achieve success at Heron Innovations Factory. For us, quality means more than just components being perfectly manufactured. Consistent quality is the basis of all our processes. This includes first-class customer care and the perfect service - from the very first meeting to the moment your product gets finally accepted.

As one of the most modern CNC manufacturing companies in Europe, we guarantee you maximum flexibility, consistent production quality, absolute adherence to deadlines and 100% reliability in every respect - thanks to our fully-automated production processes.

## **Reliability is our strength - on-time deliveries are guaranteed!**

You can rely on us - we are trustworthy and deliver on time! We pride ourselves on offering our customers not only high-quality products, but reliable deliveries too. Our specific know-how in the field of logistics enables us to always meet our delivery deadlines and ensure that everything runs smoothly. Ensuring that you can depend on our deliveries is always our top priority.

**Personal consultations**  
for total customer satisfaction

**Comprehensive expertise**  
thanks to a highly-qualified team

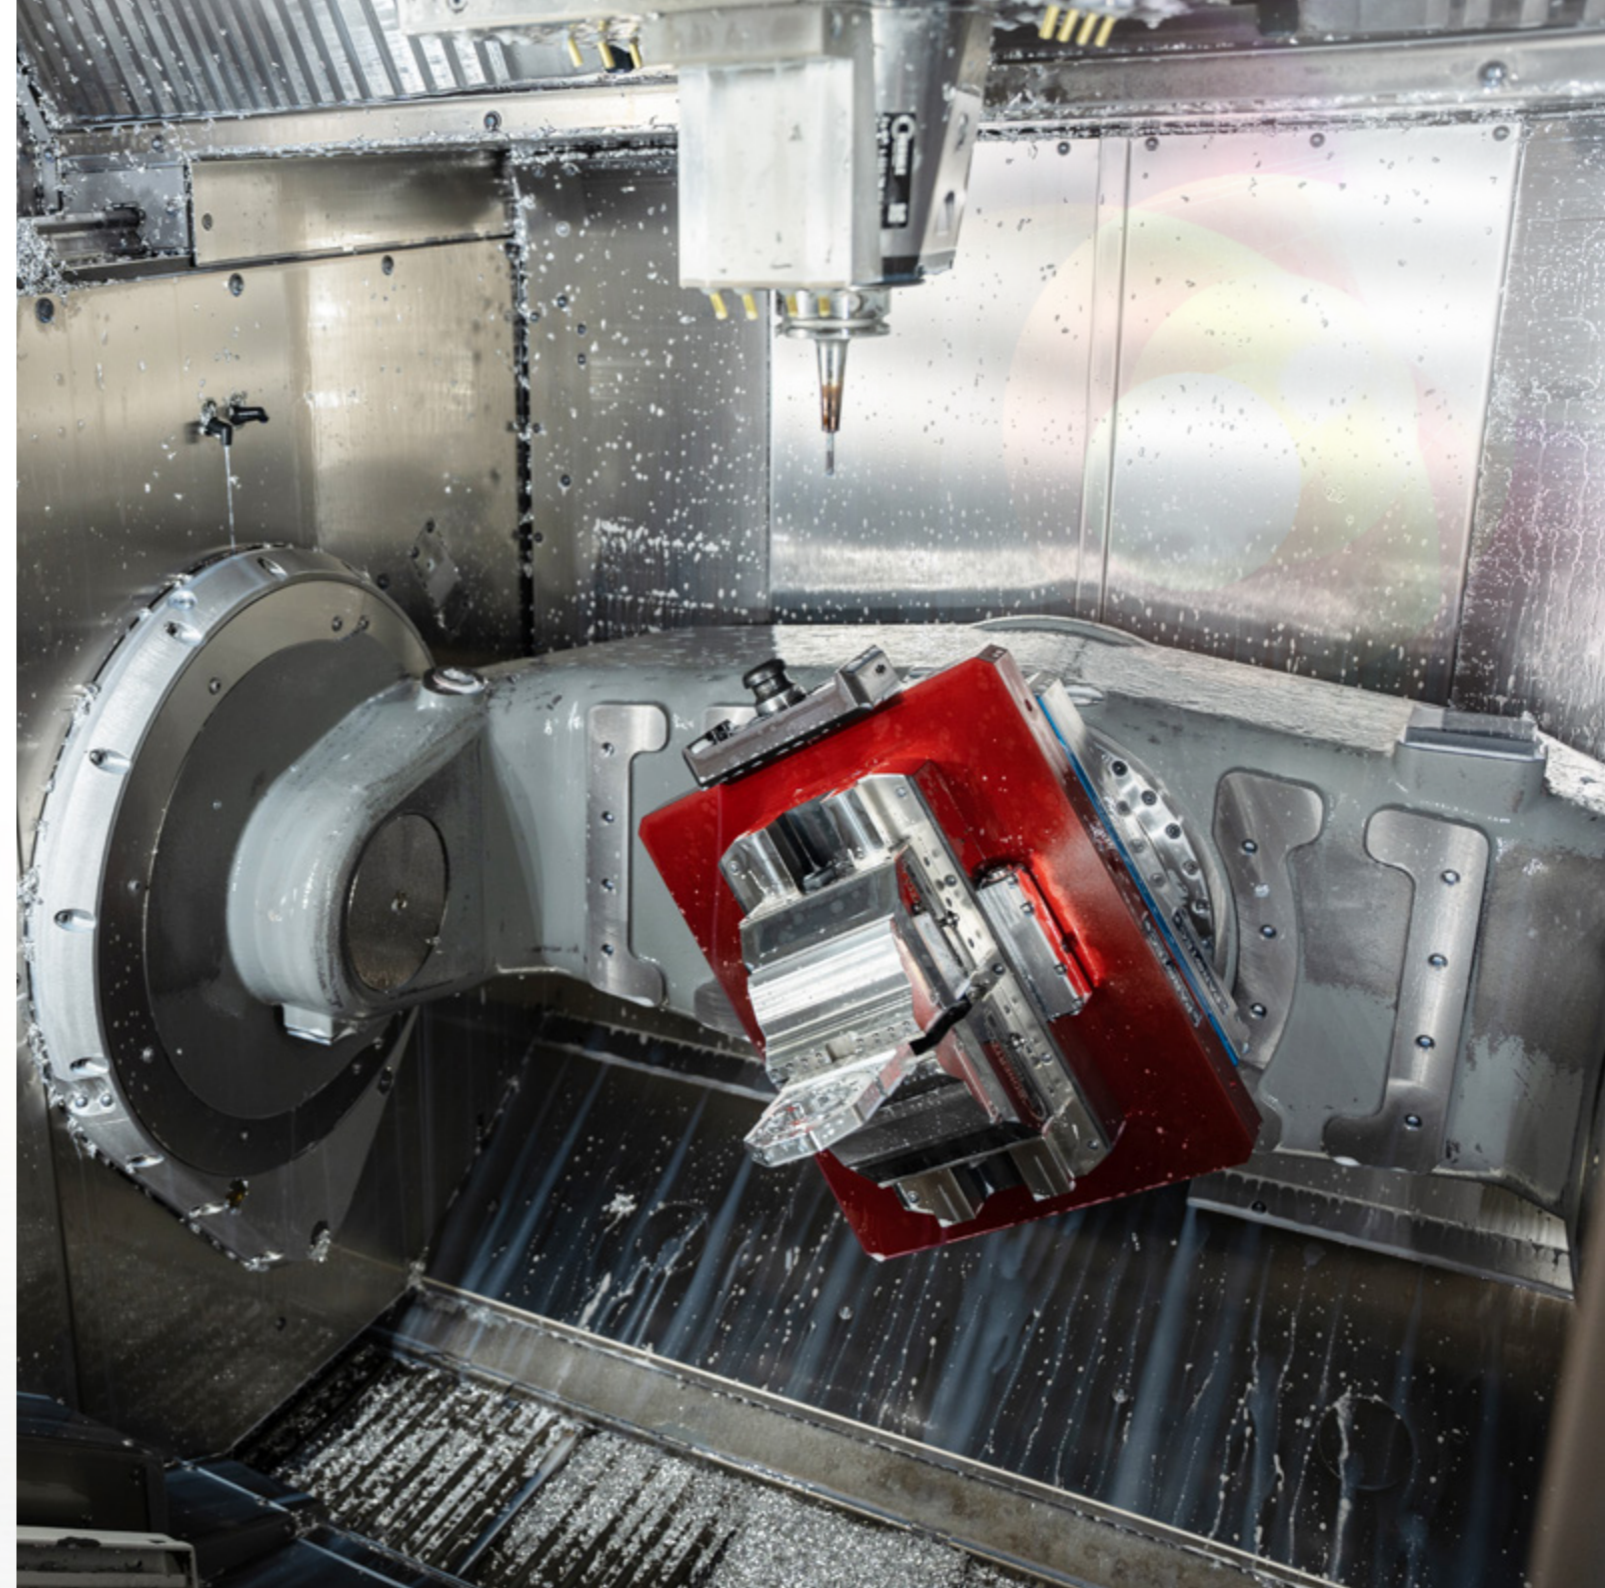

**Perfect contract production**  
to meet individual requirements

**State-of-the-art machinery**  
to meet the highest technical demands

**Ultra short set-up times**  
for maximum efficiency and productivity

**Ultra fast delivery times**  
with supreme flexibility and  
a 24/7 service

**Full service package**  
from quote to delivery

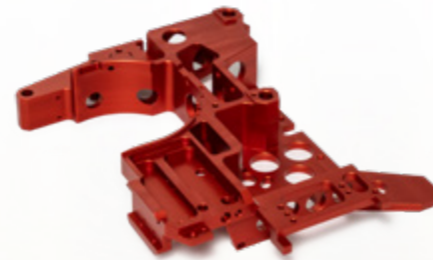

## Efficient consultations - straightforward and reliable

Do you know what you need and require? Then simply let us know and we can work together to find the best solution, starting off our quality service with a consultation. We support our customers from the initial planning phase through to successful project implementation.

The effort and costs involved in subsequent CNC production are often defined as early as the planning phase. Let us advise you and reap the benefits from over 35 years of experience in mechanical engineering, automation and CNC technology. You're also welcome to visit our premises to get an immediate impression of our company with your own eyes.

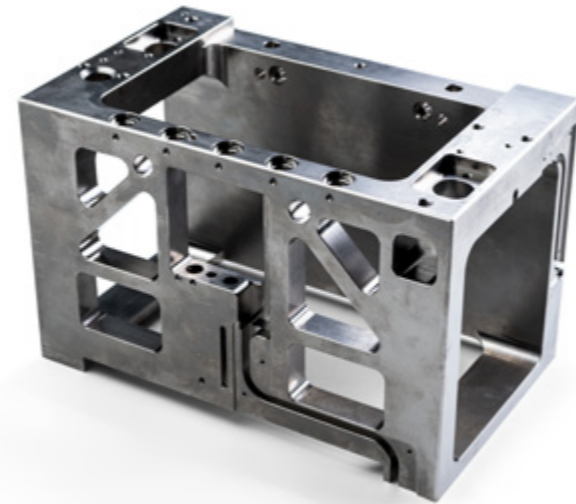

### Good advice saves money!

As a general rule, a single appointment with us is all you need to clarify all the relevant information. This saves you valuable time and money and we can provide you with a binding quote immediately afterwards through consistent process reliability. From the moment the order is placed, you can rely on the fact that everything will run like clockwork.

*We would like to invite you to visit our premises, so you can see what we can do with your own eyes.*

## Services you can rely on

**The best advice. The highest quality. 100 % delivery reliability. Made in Austria.**

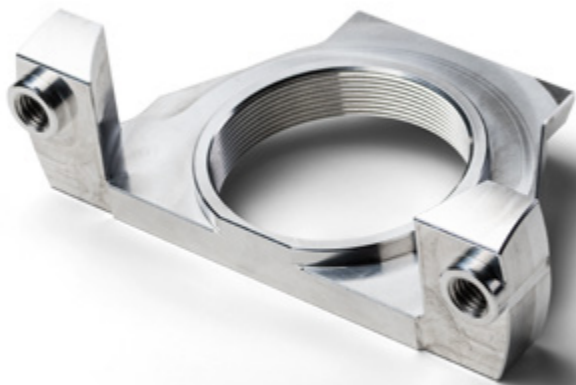

"Trust through automation" is our motto. It is the fundamental principle of all our processes - from when you first contact us to the moment we deliver. For us, this means continuously perfecting all processes involved in CNC technology, working out any potential improvements in milling for our customers.

Whether it's a matter of individual part design, customized production of series parts or heat and surface treatments - all production processes are performed under one roof. We always take a holistic view of all processes with a focus on flawless production.

The latest technology, such as articulated arm robots, combined with our ERP and storage system where components are automatically loaded and unloaded, as well as a state-of-the-art machine simulator, establish ideal processing sequences even before production begins, ensuring a consistently smooth production process.

***We offer a wide range of services, from producing prototypes to series parts.***

# Impressive technology

Our state-of-the-art 5-axis machining centers enable efficient, precise production processes for parts using multi-sided machining in just one setting. All axes move simultaneously so that we can guarantee you maximum precision with series quality and the best process reliability. This innovative technology ensures maximum reaction speed, efficiency and flexibility, saving on valuable time, materials and energy as well as protecting the environment and reducing your costs.

Our modern machinery enables us to manufacture products for you with high precision and efficiency. We currently use the following CNC milling centers:

- 5 Hermle C 400 with 5 axes
- 1 Hermle C 400 V with 3 axes
- 8 Hermle C 32 with RS2 automation
- 1 Hermle C 40 with pallet changer

## Fully-automated production around the clock

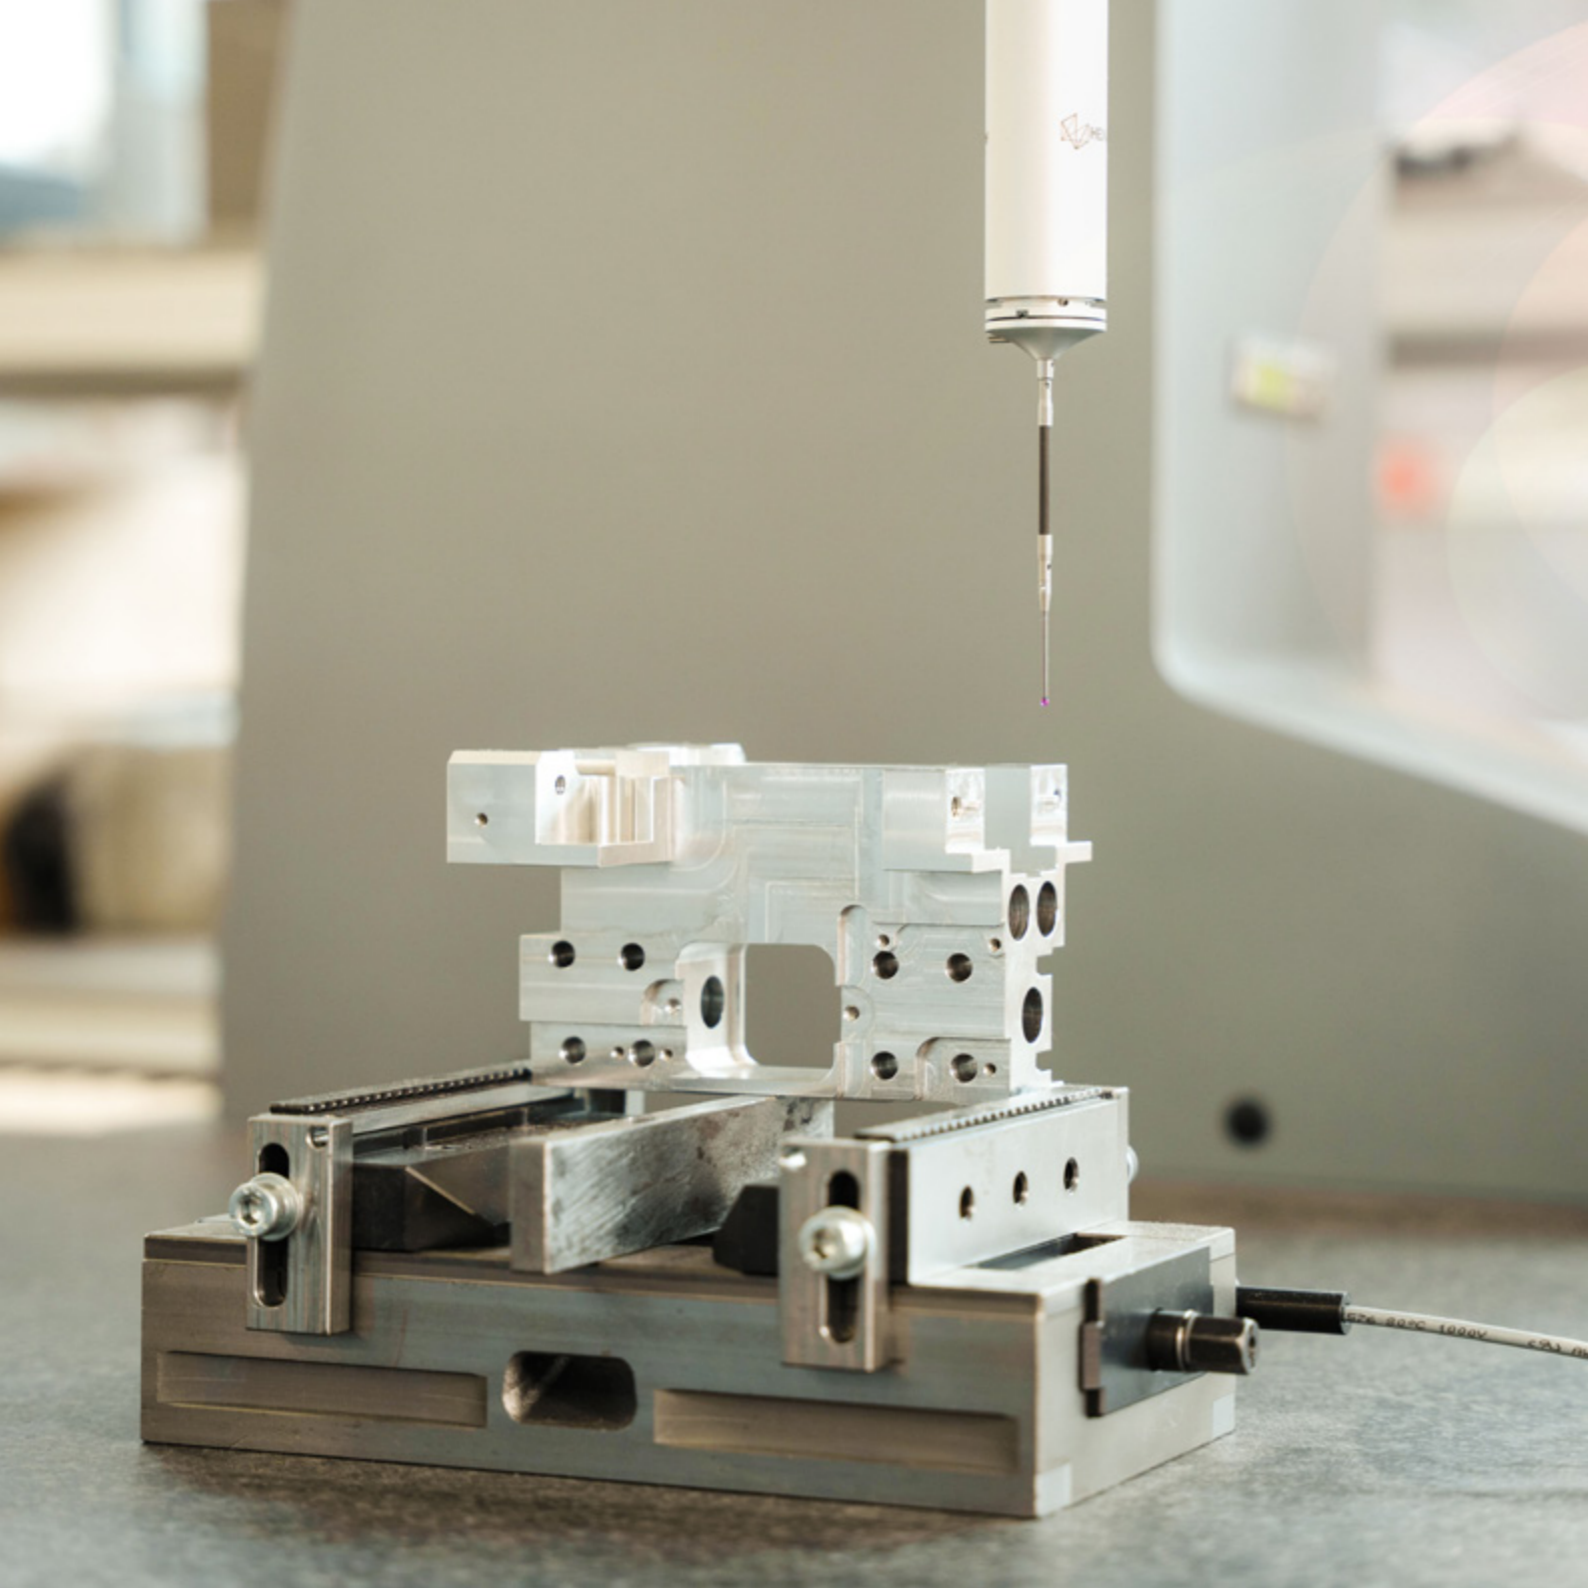

The combination of C 32 U machines with RS2 robot systems and a modern intralogistics system makes for a real highlight. Servus Intralogistics, another company in the Heron Group, ensures an efficient supply to the machines through interface-free automation of warehouse and production logistics. The network of milling machines, articulated robots and the Servus system enables fully-automated production, from goods receipt through to production to dispatch. This innovative technology ensures maximum reaction speed, efficiency and flexibility, saving on valuable time, mate-

rial and energy, as well as protecting the environment and reducing your costs.

## Milling center travel ranges:

- X 800
- Y 600
- Z 500

## Guaranteed quality and reliability

At Heron CNC-Technik, you can always rely on your individual requirements being fulfilled to perfection, in every instance. Whether prototypes or series parts, we are your reliable partner for high-quality CNC contract production.

### Full service package

Based on your 3D data, you will receive a binding offer from us within a few hours with an agreed time frame and individual delivery conditions. From the moment you place the order, your project will run like clockwork and you won't have to worry about a thing. You can trust us without hesitation.

### State-of-the-art CAD/CAM technology

Using state-of-the-art software, we program and mill up to 5 axes simultaneously. We transfer your data in all common formats to our CAM system, which is directly connected to the CNC milling machines. This means that everything runs quickly, on schedule and with absolute reliability.

### Maximum process reliability

As most of our processes are automated, we guarantee maximum process reliability at all times. Whether small or large batch sizes, all production processes are consistently smooth and precise.

### Strict adherence to deadlines

We consider quality and reliability to be a prerequisite for a lasting, trusting partnership. That is why we attach great importance to offering the maximum flexibility, rapid responses and guaranteed adherence to deadlines.

# Heron CNC-Technik guarantees

## State-of-the-art 24/7 production

Whether we are producing single items or series parts, we use a three-shift rotating schedule and highly-automated Hermle CNC milling centers only, so we can guarantee reliable deliveries and the highest quality.

## Cost-saving stock management

Reduce your effort and storage costs by working with us: we are happy to supply you to your door via framework agreements or a customized Kanban system. On-time, neatly-packaged deliveries round off our service.

## A wide variety of materials

Aluminum is not just our element, it is our passion. All other common materials - from steel to plastic - are also machined to your specifications using our 5-axis machining centers.

## Versatile surface treatment

Anodizing, powder coating, galvanizing and much more: it goes without saying that we take care of surface treatment for your parts in cooperation with our long-standing partners.

# Our team is here for you

Professional, experienced, service-oriented and highly-motivated

Highly-qualified employees form the basis for our high-quality, reliable CNC contract manufacturing service. Thanks to the combination of specialist knowledge with state-of-the-art technology, we are consistently able to fulfill your individual requirements efficiently and effectively, guaranteeing maximum precision and always meeting deadlines.

## At home in an array of sectors

As part of the Heron Group, we are constantly drawing on synergies from over 35 years of experience in special machine construction, automation technology and intralogistics. These insights give us a comprehensive understanding of the specific needs of a wide range of industries and provide us with a high level of expertise in finding solutions. Our long-standing customers work in fields ranging from mechanical engineering and automobile supply, through to semiconductor and medical technology, and many more.

We pride ourselves on offering our customers not only first-class production, but first-class service too. We keep our promises, because customer satisfaction is always our top priority.
